Integrated Solar Manufacturing & Technology Since 1964

620-640W /Output power

22.9% /Maximum efficiency

0~+5W /Power tolerance

PID Resistant

Strict selection of encapsulation materials eliminates PID risk.

Better Performance

30-year linear warranty, 1% decline in the first year an average annual decline of 0.40% over the first 30 years, increased returnon investment
No Boron-oxygen LID(Light Induced Degradation).

High Returns

The n-type module has lower annual attenuation, better photoelectric conversion efficiency and temperature coefficient benefit, bifaciality can reach 80%.

Multi Busbar Technology

Better light utilization and current collection ability, effectively improve the power output and reliability.
